About the Course

Target Audience: Dermatologists

The course features nationally recognized speakers who will provide new and updated information on dermatologic and surgical/cosmetic therapy.

The course will provide current, useful information that will be clinically germane and directly applicable to patient care.

Learning Objectives:

After completing this learning activity, the participant will be more apprised about:

- Describe dermoscopy and its use in clinical practices;
- Compare and contrast anti-itch therapies;
- Define cosmetic evaluation process and apply results to management strategies;
- Summarize efficacy and indications for new and selected medical/dermatological/surgical therapies to treat conditions that include hair loss, contact dermatitis, hematomas, and facial rejuvenation.
