Intensive Review of Endocrinology and Metabolism

This educational activity will provide an intensive review of endocrinology and metabolism to prepare you for the endocrine board certification examination. The quality and breadth of this symposium content is also attractive for a comprehensive review of endocrinology and metabolism clinical information.

You Will Learn To:
- Describe differing management strategies for patients with endocrine disorders including endocrine hypertension, adrenal dysfunction, and obesity;
- Critically appraise the issues associated with endocrine disorders in pediatric patients;
- Summarize diagnosis and management strategies for disorders of the thyroid, pituitary, and adrenal glands;
- Describe the potential impact of endocrine disorders on pregnancy and menopause;
- Describe diabetes complications and the impact of new insulin and incretin therapies;
- Evaluate and treat patients with gonadal and pituitary disorders;
- Describe diagnosis and treatment strategies for oncologic endocrine disorders including thyroid and pancreatic tumors.

Who Should Attend
This review is directed to practicing endocrinologists, fellows, and other health care professionals with an interest in endocrinology, metabolism and diabetes.
