

WHAT AI LOOKS LIKE ON THE NURSING FLOOR

DATE	FRIDAY, JULY 11TH
TIME	1:00 - 1:45 PM ET
LOCATION	BALLROOM C, 2ND FLOOR

Nearly two-thirds of nurses (62%) report burnout. Staffing shortages, higher patient complexity, and the emotional toll of frontline care have intensified since the pandemic, fueling turnover, fatigue, and disengagement across the nursing workforce.

Amid these challenges, generative AI offers potential to reduce documentation burden, improve care team communication, and restore time for meaningful patient interaction. However, sustainable success requires more than just new tools—it demands co-developing solutions with nurses, thoughtful change management, and a deep understanding of the realities they face.

Join nursing leaders representing diverse health systems for a candid discussion on how generative AI, when built by nurses for nurses, helps ease workflow friction. Panelists will share learnings from pilot implementations, the role of generative AI in reducing burnout, and how their organizations are assessing these solutions to create a more sustainable future for nursing.

MODERATOR

Reba Schenk
VP of Partner Experience, Abridge

SPEAKERS

Ryannon Frederick
CNO, Mayo Clinic

Misti Foust-Cofield
CNO, Reid Health

Brian Weirich
CNIO, Bon Secours Mercy Health
