

IL-23* and the Autoimmune Axis

You are cordially invited to an educational program sponsored by Johnson & Johnson.

A relationship exists between psoriasis, psoriatic arthritis, and inflammatory bowel disease. During this presentation, we will travel along the autoimmune axis affecting the skin, joints, and gut through explorations of pathogenic commonalities, such as environmental triggers and genetics/epigenetic susceptibility.

Disclosure

In adherence with PhRMA guidelines, spouses or other guests are not permitted to attend company-sponsored programs.

For all attendees, please be advised that information such as your name and the value and purpose of any educational item, meal, or other items of value you receive may be publicly disclosed. If you are licensed in any state or other jurisdiction, or are an employee or contractor of any organization or governmental entity, that limits or prohibits meals from pharmaceutical companies, please identify yourself so that you (and we) are able to comply with such requirements.

Please note that the company prohibits the offering of gifts, gratuities, or meals to federal government employees/officials. Thank you for your cooperation.

This promotional educational activity is not accredited. The program content is developed by Johnson & Johnson. Speakers present on behalf of the company and are required to present information in compliance with FDA requirements for communications about its medicines.

Speakers are being compensated for participation in this program.

*Interleukin-23.

Saturday, May 10, 2025
