Comprehensive and Immersive Soft Tissue Pathology Course

This four-day course is a one-of-a-kind experience set in the heart of one of the country's busiest soft tissue pathology consultation practices. Participants will have the opportunity to digitally preview a wide variety of soft tissue cases spanning from benign lesions and reactive mimics to high grade sarcomas, followed by interactive case-based discussions with world-renown faculty. Interspersed lectures focusing on a practical approach to common diagnostic scenarios will complement these case sessions. During this course, pathologists will develop skills and tools to work-up and triage mesenchymal lesions encountered in every-day practice.

Who Should Attend?

Pathologists, Pathology Residents and Fellows

Course Objectives:

- Comprehend the utility of immunohistochemical, molecular techniques and radiology studies in the work-up of soft tissue tumors
- Develop a work-up strategy for the diagnosis of mesenchymal neoplasms
- Identify common and uncommon soft tissue tumors
- Recognized pitfalls commonly encountered in soft tissue pathology
