

Equity in Health Care: Exploring Disparities in Peripheral Artery Disease in Marginalized Communities

Key Takeaways:

- Focus on late-stage peripheral artery disease (PAD) and the disparities in treatment outcomes between different racial groups
- Save Legs. Change Lives™: an initiative aimed at creating urgency and action to address the hidden threat of PAD-related amputation, with an initial focus on reaching Black Americans, who are more than twice as likely to be impacted by PAD than white Americans

Presenter:

Richard E. Browne, MD, FACC

Senior Medical Executive,
Health Systems and Health Equity
Janssen Cardiovascular & Metabolism Medical Affairs

Panel Discussion:

Highlights:

- Discuss the current landscape of healthcare disparities in PAD
- Addressing healthcare disparities in PAD, where experts shed light on this critical issue and explore ways to bridge gaps in care

Panelists:

Avery Ince, MD, PhD

Vice President of Janssen Cardiovascular & Metabolism Medical Affairs

Foluso Fakorede, MD*

Interventional cardiologist and founder of Cardiovascular Solutions of Central Mississippi

Lyssa Ochoa, MD*
