# Join us for the Cleveland Clinic 30th Annual Pediatric Board Review

Dear Colleague:

I am pleased to invite you to attend our Pediatric Board Review.

This nationally recognized 5 ½ day course provides a comprehensive pediatric board review to prepare you for board certification/recertification, and also offers MOC. The quality and breadth of content is also beneficial for individuals needing a thorough review of basic pediatric clinical information.

There are several unique features that set this review apart from the others. These include the use of an anonymous audience response system, which allows attendees to gauge their knowledge base and become familiar with board-type questions while attending the course. This also allows the lecturer to introduce topics in a question and answer format and highlight board examination relevant information. In addition, there are general pediatric and specialty-specific board simulation sessions, during which board questions/answers and rationale will be discussed and explained.

If you need further information, please feel free to contact me.

Camille Sabella, MD  
Course Director
